

BrassCraft®

Committed to Quality, Driven by Innovation.

100% Compliant

STOPS | CONNECTORS | FITTINGS

 Compliant

The State of California (AB1953) and Vermont (S152) passed legislation that limits the weighted average lead content of plumbing and public water distribution system components that convey or dispense water for drinking and cooking. In each state, sale of products exceeding the new limit will be prohibited as of January 1, 2010.

BrassCraft began developing products last year to comply with this new legislation. The vast majority of the current BrassCraft products offered are being replicated to comply with these mandates. The changes we've made were developed to pass our rigorous durability standards while being aesthetically transparent to you and your customers.

We will be introducing compliant products from July 1, 2009 through October 30, 2009. This price schedule introduces our availability schedule to you and includes only those products that are affected by the new legislation. Listed in this schedule are products that comply with the new legislation along with the products they replace. New part numbers and UPC Codes are assigned to stops and fittings. The existing part numbers and UPC Codes remain the same for Speedi Plumb® and water heater connectors. In those few instances where a direct replacement is not available, we make a recommended substitute. A check mark will be used on all packaging to designate compliant products.

There are significant implications with regard to your inventory. To that end, we are launching an aggressive program communicating directly with plumbers to inform and educate them on this new legislation. We are also making these products available well in advance of the new legislation to allow you time to adjust your inventory levels and minimize your transition costs due to product obsolescence.

There will be additional communications throughout the year to update you on the progress of our collective efforts and any additional information that becomes available pertaining to this new legislation. If you have any questions, please contact your BrassCraft sales representative.

Jeffrey L. Jollay
Vice President – Marketing
