

ANNOUNCING

Sloan Antimicrobial Coatings

***Sloan Plumbing Products
with SANIGUARD® antimicrobial
product protection***

Sloan Valve Company recognizes the importance of inhibiting the growth of common bacteria, molds and fungi that cause odors, staining and product deterioration, especially in healthcare, foodservice and other critical settings.

Select SANIGUARD® antimicrobial product protection for Sloan plumbing products and systems, which:

- Provides an extra layer of protection for Flushometer handles and bedpan washers
- Offers active bacteria reduction properties that last the life of the product

For more information, go to www.sloanvalve.com.

SANIGUARD® coatings are designed to protect the product and will not protect users or others from food-borne or disease-causing bacteria. Use good hygienic and cleaning practices in addition to SANIGUARD® coatings.

SLOAN VALVE COMPANY

Plumbing Treated with Antimicrobial Product Protection

Sloan Valve Company, partnering with Component Hardware Group, creator of SANIGUARD® coatings, is proud to bring this important antimicrobial technology to the plumbing market. SANIGUARD® coatings use tri-modal efficacy to protect treated plumbing products.

Hygienic

Handles on Sloan Flushometers and bedpan washers, as well as other chrome-plated plumbing products, are cleaner and fresher when treated with the SANIGUARD® antimicrobial product protection, which retards the growth of common bacteria, molds and fungi that cause odors, staining and product deterioration.

The antimicrobial treatment is designed to protect the product and will not protect users or others from disease-causing bacteria.

Proven Effectiveness

Documented third-party research proves that SANIGUARD® antimicrobial product protection is effective against various microorganisms.

Long-Lasting

You can count on the SANIGUARD® coating on Sloan plumbing products and systems to last as long as the plumbing it's on. SANIGUARD® coatings pass all ASTM standards for hardness and abrasion and stands up to salt, bleach and other chemicals.

HOW IT WORKS

Sloan plumbing products and systems coated with SANIGUARD® antimicrobial product protection provide active reduction of bacteria in three different ways, to minimize the chance of bacteria forming a resistance.

SANIGUARD®'s silver-ion technology uses a three-pronged attack to help inhibit the growth of bacteria:

1. It attacks the bacteria's cell wall.
2. It starves the bacteria by altering the cell's metabolism.
3. It disrupts the reproductive cycle, so the bacteria can't continue to multiply.

Simply put: If the bacteria can't grow, it can't survive.

For information on Sloan plumbing products and systems available with SANIGUARD® antimicrobial product protection, contact Sloan at 800-9-VALVE-9 (800-982-5839) or visit www.sloanvalve.com.
