Hygienic

User makes no physical contact with the Flushometer surface.

Economical

Automatic operation provides water usage savings over other flushing devices. Reduces maintenance and operation costs.

Practical

Solid state electronic circuitry assures years of dependable, trouble-free operation.

Warranty

3 year (limited)

OPERATION

1. A continuous, invisible light beam is emitted from the Sloan ECOS® Sensor.

2. As the user enters the beam's effective range, 22" - 42" (559 mm to 1067 mm), the beam is reflected into the Scanner Window to activate the Output Circuit. Once activated, the Output Circuit continues in a "hold" mode for as long as the user remains within the effective range of the sensor. A full flush will automatically initiate when the user leaves.

3. Once a user is detected, the circuit automatically resets and is ready for the next user.
